

## Wage and Hour Division, Labor

## § 825.114

when school is not in session. *See* § 825.105(c).

### § 825.112 Qualifying reasons for leave, general rule.

(a) *Circumstances qualifying for leave.* Employers covered by FMLA are required to grant leave to eligible employees:

(1) For birth of a son or daughter, and to care for the newborn child (*see* § 825.120);

(2) For placement with the employee of a son or daughter for adoption or foster care (*see* § 825.121);

(3) To care for the employee's spouse, son, daughter, or parent with a serious health condition (*see* §§ 825.113 and 825.122);

(4) Because of a serious health condition that makes the employee unable to perform the functions of the employee's job (*see* §§ 825.113 and 825.123);

(5) Because of any qualifying exigency arising out of the fact that the employee's spouse, son, daughter, or parent is a covered military member on active duty (or has been notified of an impending call or order to active duty) in support of a contingency operation (*see* §§ 825.122 and 825.126); and

(6) To care for a covered servicemember with a serious injury or illness if the employee is the spouse, son, daughter, parent, or next of kin of the servicemember (*see* §§ 825.122 and 825.127).

(b) *Equal application.* The right to take leave under FMLA applies equally to male and female employees. A father, as well as a mother, can take family leave for the birth, placement for adoption, or foster care of a child.

(c) *Active employee.* In situations where the employer/employee relationship has been interrupted, such as an employee who has been on layoff, the employee must be recalled or otherwise be re-employed before being eligible for FMLA leave. Under such circumstances, an eligible employee is immediately entitled to further FMLA leave for a qualifying reason.

### § 825.113 Serious health condition.

(a) For purposes of FMLA, "serious health condition" entitling an employee to FMLA leave means an illness, injury, impairment or physical or mental condition that involves inpa-

tient care as defined in § 825.114 or continuing treatment by a health care provider as defined in § 825.115.

(b) The term "incapacity" means inability to work, attend school or perform other regular daily activities due to the serious health condition, treatment therefore, or recovery therefrom.

(c) The term "treatment" includes (but is not limited to) examinations to determine if a serious health condition exists and evaluations of the condition. Treatment does not include routine physical examinations, eye examinations, or dental examinations. A regimen of continuing treatment includes, for example, a course of prescription medication (*e.g.*, an antibiotic) or therapy requiring special equipment to resolve or alleviate the health condition (*e.g.*, oxygen). A regimen of continuing treatment that includes the taking of over-the-counter medications such as aspirin, antihistamines, or salves; or bed-rest, drinking fluids, exercise, and other similar activities that can be initiated without a visit to a health care provider, is not, by itself, sufficient to constitute a regimen of continuing treatment for purposes of FMLA leave.

(d) Conditions for which cosmetic treatments are administered (such as most treatments for acne or plastic surgery) are not "serious health conditions" unless inpatient hospital care is required or unless complications develop. Ordinarily, unless complications arise, the common cold, the flu, ear aches, upset stomach, minor ulcers, headaches other than migraine, routine dental or orthodontia problems, periodontal disease, *etc.*, are examples of conditions that do not meet the definition of a serious health condition and do not qualify for FMLA leave. Restorative dental or plastic surgery after an injury or removal of cancerous growths are serious health conditions provided all the other conditions of this regulation are met. Mental illness or allergies may be serious health conditions, but only if all the conditions of this section are met.

### § 825.114 Inpatient care.

Inpatient care means an overnight stay in a hospital, hospice, or residential medical care facility, including any period of incapacity as defined in

## § 825.115

## 29 CFR Ch. V (7-1-11 Edition)

§ 825.113(b), or any subsequent treatment in connection with such inpatient care.

### § 825.115 Continuing treatment.

A serious health condition involving continuing treatment by a health care provider includes any one or more of the following:

(a) *Incapacity and treatment.* A period of incapacity of more than three consecutive, full calendar days, and any subsequent treatment or period of incapacity relating to the same condition, that also involves:

(1) Treatment two or more times, within 30 days of the first day of incapacity, unless extenuating circumstances exist, by a health care provider, by a nurse under direct supervision of a health care provider, or by a provider of health care services (*e.g.*, physical therapist) under orders of, or on referral by, a health care provider; or

(2) Treatment by a health care provider on at least one occasion, which results in a regimen of continuing treatment under the supervision of the health care provider.

(3) The requirement in paragraphs (a)(1) and (2) of this section for treatment by a health care provider means an in-person visit to a health care provider. The first (or only) in-person treatment visit must take place within seven days of the first day of incapacity.

(4) Whether additional treatment visits or a regimen of continuing treatment is necessary within the 30-day period shall be determined by the health care provider.

(5) The term “extenuating circumstances” in paragraph (a)(1) of this section means circumstances beyond the employee’s control that prevent the follow-up visit from occurring as planned by the health care provider. Whether a given set of circumstances are extenuating depends on the facts. For example, extenuating circumstances exist if a health care provider determines that a second in-person visit is needed within the 30-day period, but the health care provider does not have any available appointments during that time period.

(b) *Pregnancy or prenatal care.* Any period of incapacity due to pregnancy, or for prenatal care. *See also* § 825.120.

(c) *Chronic conditions.* Any period of incapacity or treatment for such incapacity due to a chronic serious health condition. A chronic serious health condition is one which:

(1) Requires periodic visits (defined as at least twice a year) for treatment by a health care provider, or by a nurse under direct supervision of a health care provider;

(2) Continues over an extended period of time (including recurring episodes of a single underlying condition); and

(3) May cause episodic rather than a continuing period of incapacity (*e.g.*, asthma, diabetes, epilepsy, *etc.*).

(d) *Permanent or long-term conditions.* A period of incapacity which is permanent or long-term due to a condition for which treatment may not be effective. The employee or family member must be under the continuing supervision of, but need not be receiving active treatment by, a health care provider. Examples include Alzheimer’s, a severe stroke, or the terminal stages of a disease.

(e) *Conditions requiring multiple treatments.* Any period of absence to receive multiple treatments (including any period of recovery therefrom) by a health care provider or by a provider of health care services under orders of, or on referral by, a health care provider, for:

(1) Restorative surgery after an accident or other injury; or

(2) A condition that would likely result in a period of incapacity of more than three consecutive, full calendar days in the absence of medical intervention or treatment, such as cancer (chemotherapy, radiation, *etc.*), severe arthritis (physical therapy), or kidney disease (dialysis).

(f) Absences attributable to incapacity under paragraph (b) or (c) of this section qualify for FMLA leave even though the employee or the covered family member does not receive treatment from a health care provider during the absence, and even if the absence does not last more than three consecutive, full calendar days. For example, an employee with asthma may be unable to report for work due to the onset of an asthma attack or because
